AMENDMENTS TO THE ABSTRACT:

Please amend the Abstract as follows:

ABSTRACT

A chair ~~with~~has a seat and a backrest, a structure supporting the seat, and a base;
~~t.~~ The support structure has two lateral uprights and at least one projecting element
provided with a substantially longitudinal guide, ~~and t.~~ The backrest is associated with
two ~~right-angled~~right angled elements; each of the ~~right-angled~~right angled elements has a first end connected to
the backrest, a central part connected rotatably by means of a first hinging pin to a top
end of one of the uprights of the support structure of the seat, and a second end connected
by ~~means of~~a second hinging pin to the seat; ~~t.~~ The seat is connected to the support
structure by ~~means of~~a telescopic rod, which can be shortened and lengthened in a
resilient manner, and an element which can be slidably engaged in the guide of the
projecting element. ~~(Fig. 2)~~
